1:15 **Lunch**

There will be ample time for discussion and debate over the 2 days

IBCI Conference 2006

The Irish Building Control Institute is pleased to present the IBCI Building Control Conference, 2006. The conference will afford an opportunity for those involved in building control throughout the state to consider the effects the proposed new legislation will have on Building Control and the built environment.

The Conference will be held over two days in the **Corrib Great Southern Hotel, Galway**. Lunch and refreshments will be provided on both days, with the conference dinner on Tuesday evening. A **Trade Exhibition** will also be held in conjunction with the conference.

Day 1 will introduce the Building Control Bill 2005 and the proposed changes to building control procedures, fire safety and disabled access certification and enforcement of building control in the state. The experience of implementing building control in Scotland, a near neighbour of similar population should provide a useful comparison.

Day 2 will include presentations on the proposed changes in the Building Control Bill including requirements for the fire safety certification of buildings and the new proposals on building energy ratings. The presentation on sound insulation testing should be of help to Building Control practitioners in dealing with the issues relating to the many sound and noise complaints made by residents of dwellings. The issue of registration of title will also be explained at this session
